Effect of Cloud Computing Systems in Terms of Service Quality of Knowledge Management Systems

# Behdad Karimi

Data Science enthusiast

## Summary

I'm interested in data science. I studied software engineering and got my master's degree in information technology. For a while, I worked as a business consultant and did business planning (BP and BDP). As a co-founder, I was involved in two startups and had technical responsibility for these two startups. I have been following Data Science and AI topics since I was a student and had two articles and several activities during my time at the university. I've been seriously into Data Science for a while now, working as a freelancer and learning at the same time.

Skilled in Java, Python, Databases, Tableau, and English. Strong information technology professional with a Master's degree focused in Information Technology from Qom University.
